Procurri Europe

Adjusting the kVA level to save £4,000

Procurri Europe is a large global independent provider of IT lifecycle services and data centre equipment.

Challenge

As part of our bill validation service, Power Direct Ltd identified that the electricity distributor had allocated a supply capacity of 60 kVA for one of Procurri Europe's sites. Despite this, Procurri Europe was being charged for 200 kVA by their supplier.

It meant that the business was paying much higher charges than they should – and had been for some time.

Resolution

Power Direct Ltd raised the issue with the supplier and worked with them to refund Procurri Europe more than £4,000 for the periods incorrectly billed.

Roger Rapsey

Compliance Manager, Procurri Europe

"With Power Direct on hand, I don't need to worry about the complexities of my energy needs and contracts. Not only have they delivered significant savings, but the experienced team is perfectly placed to promptly and efficiently resolve all my queries."
